

# Together, we've saved over \$1 Billion with energy efficiency.

HERE'S HOW  
TO KEEP SAVING 

Progress Energy

SAVE THE WATTS  
.COM

## Partners in Savings.

### **\$1 Billion Saved** through energy-efficiency programs.

By participating in our residential and business energy-efficiency programs, **Florida customers have saved over \$1 Billion**. That's enough energy savings to power the city of St. Petersburg for over 5.1 years – and reduce emissions in an amount equal to removing over 1.8 million cars off the road!

Energy efficiency is one of the few investments that truly guarantees a return. In fact, if all customers participated in our energy-efficiency programs, they could save over \$100,000,000 and reduce carbon emissions by 500,000 tons in the first year alone.

## It all starts with a free **Home Energy Check**.

The first step to increased savings is to schedule a **Home Energy Check**. This free service gives you an analysis of your home's energy use and a list of customized energy-saving recommendations and information about rebates on home improvements that will lower your energy costs and add value to your home. With your in-home energy check, you may also receive a free Energy-Efficiency Kit\* that's filled with several energy-saving items that can save you up to \$280 in energy costs over the life of the provided materials.

### The Energy-Efficiency Kit includes:

**Compact Fluorescent Light Bulbs (CFLs)**

**Weather Stripping**

**Refrigerator Thermometer**

**Hot Water Temperature Gauge**

**Electric Outlet Insulators**

Yearly savings listed are estimates and are based on a typical home of approximately 1,850 sq. ft. with an annual kWh usage of 15,500 and are calculated at \$.13/kWh for simplification. They are based upon engineering assumptions and approximations from PEF Base Study, DOE and ENERGY STAR. Actual savings may differ from those estimated, due to variations in weather, individual energy use habits and home characteristics.

\* Free energy-efficiency kit given upon completion of a Home Energy Check conducted at your home by a Progress Energy Advisor. Kits are for a residential Home Energy Check only.

# Ready to start saving?

If you've already completed a Home Energy Check, now's the time to take advantage of our powerful savings programs and rebates, and get your share of the next billion saved.

Many of these home improvements may also qualify you to receive a federal tax credit up to \$1,500. Visit [energystar.gov](http://energystar.gov) or [doe.gov](http://doe.gov) for specific information.

To find out more or to sign up for a free Home Energy Check, call **1.866.821.5343** or visit [savethewatts.com/billionsaved](http://savethewatts.com/billionsaved).

| SAVINGS PROGRAMS                                 | REBATE OFFERED      |
|--|---------------------|
| <b>Attic Insulation</b>                          | <b>\$75 or more</b> |
| <b>Wall Insulation</b>                           | <b>Up to \$300</b>  |
| <b>Air Duct Repair</b>                           | <b>Up to \$150</b>  |
