BILLING ADJUSTMENTS

Each of the rate schedules listed is subject to a Fuel Cost Recovery Factor (the cost of fuel). The Energy Charges include an Energy Conservation Cost Recovery Factor (the cost of energy conservation programs), a Capacity Cost Recovery Factor (a portion of the cost of purchasing electricity from sources other than Progress Energy Florida), an Environmental Cost Recovery Clause (the cost of new environmental programs not in base rates), and a Storm Cost Recovery Surcharge (the cost associated with the 2004 hurricane season). These factors are normally revised each January by the Florida Public Service Commission.

Commercial/Industrial RATE SCHEDULES

Progress Energy

Rates effective with January 2006 Billing

(Covers usage during the period indicated on the bill)

Rising energy prices are affecting all of us. Like you, we at Progress Energy, have little control over this global issue. However, we are committed to going the extra mile to help ease the effect of these high prices.

We have worked with regulators to keep base rates stable. In fact, base rates will stay at their current level through 2007. However, the Florida Public Service Commission recently approved our request for an increase in fuel rates as a result of our higher fuel costs. These rates reflect the actual cost of fuel only – we make no profit on the charges. We are sensitive to the impact these higher rates will have on our customers and are working hard to keep our fuel expenses under control.

You can help keep your costs down by using power efficiently and choosing the best rate schedule for your situation. We offer three categories of commercial and industrial rate schedules depending on service requirements: General Service, Curtailable Service and Interruptible Service. In each category are standard and optional Time of Use (TOU) rate schedules offering incentives to shift as much consumption as possible to off-peak periods of day.

Several less commonly used rate schedules are also offered, including Lighting Service (LS-1), Standby Service (SS-1, SS-2 and SS-3) and Temporary Service (TS-1). Two Energy Management rates (Load Management GSLM-1 and GSLM-2) are also available to general service customers.

Unless stated otherwise, all rates are quoted at secondary voltage.
