

Progress Energy Commercial Energy Efficiency Programs
2013 Program Summary

	Retrofit / Better Business	New Construction
Lighting		
Indoor Lighting Upgrades	Modified*	Modified*
Occupancy Sensors	No changes	Program eliminated*
HVAC		
Chillers	No changes	Modified*
Demand Control Ventilation	No changes	No changes
Duct Test & Repair	No changes	No changes
Energy Recovery Ventilation	No changes	No changes
Heat Pumps <65,000 Btu/h	No changes	No changes
HVAC Steam & Chemical Cleaning	No changes	Retrofit only
Packaged Terminal Heat Pump	No changes	Modified*
RTU Recommissioning	No changes	Retrofit only
Thermal Energy Storage	No changes	No changes
Unitary A/C & Heat Pumps >65,000 Btu/h	No changes	Modified*
Building Envelope		
Cool Roof	No changes	No changes
Roof /Ceiling Insulation	No changes	Modified*
Green Roof	No changes	No changes
Window Film/Screen	No changes	Program eliminated*
Industrial		
Motor Upgrades	Modified*	Modified*
Efficient Compress Air System	No changes	No changes

*Rebate program requirements and qualifications will be altered or removed to reflect updated Code standards. These changes are a result of either increased baseline efficiency requirements and/or code requiring use of certain products.
