

## Load Profiler Online

### Pricing Information

Load Profiler Online (LPO) is a powerful web-based service that Duke Energy offers to provide in-depth information on how your facility uses energy. With its intuitive tables and graphs, LPO offers easy-to-understand information on load profiles, usage history and a variety of statistics gathered from the 15 minute incremental data.

The Load Profiler Online service can be installed on one meter or on multiple metered services and is billed separately for each service. The benefit of registering multiple meters on the LPO service is the ability to group facilities by area, hours of operation, and production data so that you can normalize and benchmark energy data. The LPO system also provides the ability to provide automated reports and alerts that can be emailed. Armed with such information, customers can make informed and proactive decisions about their energy usage. It's an incredibly helpful tool in measuring energy. After all, you cannot manage what you cannot measure.

Data refresh from the meter to the Duke Energy LPO system can occur monthly, weekly or daily. Below is a list of LPO data refresh options and prices for your review:

#### **Monthly Data Refresh**

Account <1000kW/month – Install Cost \$138, plus a Monthly Cost \$26.25

Account >1000kW/month – Install Cost \$50, plus a Monthly Cost \$25.00

#### **Weekly Data Refresh**

Account <1000kW/month – Install Cost \$138, plus a Monthly Cost \$50.75

Account >1000kW/month – Install Cost \$50, plus a Monthly Cost \$25.00

#### **Daily Data Refresh**

Account <1000kW/month - Install Cost \$138, plus a Monthly Cost \$73.95

Account >1000kW/month - Install Cost \$50, plus a Monthly Cost \$45.00

Please contact Duke Energy's CIG Support Team anytime at 877-342-5372 if you would like further information or if would like to register to start utilizing the LPO service. To start using the LPO service simply let us know the address and meter number of the facilities that you want registered, and we will start the process of having the system built for your access.
