

All rates effective with January 2013 billing

Important information about Progress Energy Florida's 2013 residential rates

Progress Energy Florida has submitted requests with the Florida Public Service Commission (PSC), to lower customers' bills in 2013. Pending approval by the PSC, the changes requested by the company will result in an annual savings of more than \$85 for residential customers using 1,000 kilowatt-hours (kWh) per month. A monthly bill for a residential customer using 1,000 kWh will be \$116.06, beginning with January 2013 billing.

This 6 percent reduction resulted from Progress Energy's annual filings projecting costs for fuel and purchased power, environmental projects, conservation programs and new nuclear generation. The total reduction includes a \$129 million refund to customers in 2013 as part of a comprehensive rate settlement previously approved by the PSC. Customers will benefit from settlement-related refunds totaling \$288 million through 2016. The largest decrease is in the fuel charge, which recovers the actual cost of fuel, mainly natural gas and coal, used to generate electricity. The continued low commodity price of natural gas and the settlement refund have reduced this charge. Based on the PSC's decisions, these changes will save a residential household \$7.13 per month on a 1,000-kWh bill.

Progress Energy Florida is focused on keeping electric costs as low as possible for the more than 1.6 million households and businesses that depend on us. The company is working every day to operate the business more efficiently while continuing to provide customers increasingly clean, reliable and affordable power now and in the future.

Breakdown of the 2013 monthly bill statement

This bill belongs to a sample customer who uses 1,500 kWh of electricity each month.

- ① Customer charge:** A fixed monthly amount to cover the cost of providing service to your location. This charge is applicable whether or not electricity is used.
- ② Energy charge:** All the costs, other than fuel, involved in producing and distributing electricity.
- ③ Fuel charge:** This includes the actual cost of fuel used to produce electricity. The company's two largest fuel sources are coal and natural gas. Fuel costs are passed through from fuel suppliers to customers with no profit to the company. This charge is adjusted annually to reflect changes in the cost of fuel.
- ④ EnergyWise® Home program credit:** EnergyWise Home is a free program that offers qualified participants a credit of up to \$147 a year depending on their monthly energy usage and the appliances enrolled in the program.
- ⑤ Gross receipts tax:** Collected in accordance with Florida state statutes. This tax is assessed on all electric public utilities and paid directly to the state. Progress Energy Florida does not keep these tax monies.
- ⑥ Franchise fee:** This is a fee that we collect to compensate communities for using their rights of way. All of the fee is sent back to the local community; Progress Energy Florida does not keep any franchise fees. Fees vary by community.
- ⑦ County/municipal utility tax:** In accordance with state law, a county/municipality may levy a tax on the purchase of electricity within that area. This tax is paid directly to your county/municipality. Progress Energy Florida does not keep any of these taxes.
