

Energy-efficient lighting quickly pays for itself.

Lighting is a major part of any business's energy bill. Upgrading to more energy-efficient lighting can make a real impact – saving up to 50 percent on lighting costs.

In fact, the savings are so significant that the upgrades quickly pay for themselves. Combined with our rebates, these savings make energy-efficient lighting an easy way to boost your bottom line.

Calculate the savings

For example, by upgrading 25 fixtures with four T-12 lamps to T-8 lamps with new electronic ballasts, you could save your business almost \$900 in the first year alone. And since the bulbs keep saving you money, year after year, the savings really add up – to more than \$7,000* over the life of the bulbs.

Number of fixtures	Operating hours per year*	kW savings per fixture*	Cost per kWh*	Savings
25	x 2,600	x .092	x \$0.13	\$777.40

Savings	Duke Energy rebate	First-year savings
\$777.40	+\$115	\$892.40

* Actual lighting rebate and potential energy savings may vary depending on number of lamps, wattage and type of ballast installed.

• Operating hours per year based on 10 hours/day in a M-F business; kW savings per fixture = (existing fixture wattage – new fixture wattage)/1,000. Cost per kWh = average commercial cost per kWh.

LIGHTING REBATES

Fixture replacement

Get \$1–\$5 per fixture replaced by adding the following energy-efficient lighting to your business.

CFLs

T-8 and T-5 linear fluorescents

LED lighting

Occupancy sensors

These sensors reduce unnecessary lighting in sporadically used spaces like bathrooms and conference rooms, and can lower your lighting costs by 30 percent.

Occupancy sensors

How energy efficiency can help your business succeed

Energy efficiency is an easy, cost-effective way to lower operating expenses and increase comfort for your employees and customers. Take advantage of Duke Energy rebates to lower your upfront costs and shorten your payback period.

We offer rebates to cover heating and cooling, roofing, insulation, window film, duct repair and more. To learn more, visit duke-energy.com.

Get started with a free Business Energy Check

To qualify for these valuable rebates, you must first complete a Business Energy Check, a free tool that helps you identify opportunities for energy savings. You'll receive a comprehensive report with energy-saving recommendations and available rebates. To learn more, please call **877.372.8477** or email us at EESSmallCommercial@duke-energy.com.

Other requirements may apply. Rebates subject to change based upon changes in applicable local, state or federal law.

 Printed on 10% post-consumer recycled stock. Paper comes from a well-managed forest.
