

I SAVED \$150 ON MY AIR DUCT REPAIRS.

Plus, I lowered my electric bill.

Duct Repair Program

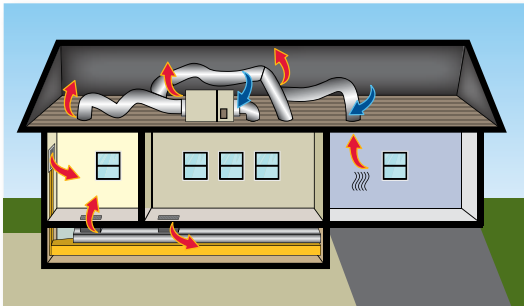

Lower your energy costs and save money on your repairs

It's easy with help from Duke Energy. We'll help you find and fix leaks in your air ducts that waste energy and money. And we'll even pay part of the cost.

Leaky air ducts waste more than heating and cooling

If your air ducts leak – and most do, regardless of the age or size of your home – then you're essentially blowing money into your crawl space, attic or even outdoors!

Air ducts carry heated and cooled air from your heater or air conditioner throughout your home. If your ducts leak, you're wasting energy and money – plus you could be pulling attic insulation, garage fumes and other contaminants into your home.

Repairs are easy

Finding and repairing air leaks in your ductwork is easy. We'll help you schedule an appointment with one of our duct repair contractors. And we'll even pay part of the cost:

Duct Test.

We pay half. Your cost is just \$30.

Duct Repair.

Average cost is \$300. We pay the first \$150 per system.

Duct test cost is for first system only. Charges for additional systems apply.

Get started today

To qualify for these incentives, you must start with a free **Home Energy Check**. This free check will provide you with a customized report of your home's energy usage, as well as easy, bill-lowering tips and information about all our incentives for energy-saving home improvements. Call **866.821.5343** or visit **duke-energy.com/save** today.

Average costs for duct repair are based on actual work completed in Duke Energy's service territory, do not include system replacement, and will vary according to home size and needed repairs. Requirements for incentives: must be Duke Energy customer, must use Duke Energy prequalified contractor who will provide estimate, must have Home Energy Check with qualifying recommendations, must have centrally ducted electric heating and cooling. Other restrictions may apply.

Fixing leaky air ducts is easy.
And it pays off:

- **Better indoor air quality**
- **Better comfort**
- **Lower energy bills**
