| FSEC CERTIFICATION/APPROVAL NUMBER | TOTAL COST \$ | INSTALLATION DATE |
| PERMIT NUMBER | DID THE CITY/COUNTY PROVIDE FINAL INSPECTION? YES <input type="checkbox"/> NO <input type="checkbox"/> | |

IMPORTANT INFORMATION – PLEASE READ THOROUGHLY BEFORE SIGNING

A PEF energy audit (Home Energy Check) is required prior to system installation to qualify for the rebate. If system construction or installation occurs prior to the required audit, PEF has no obligation to make a rebate payment to the applicant. The Progress Energy account must have whole-house electric cooling, heating and water heating participating in Progress Energy’s EnergyWise Home program. The account shall not be entitled to receive any monthly credits with respect to any other energy management program, but rather the account shall only be entitled to receive the SunSense solar water heating program monthly credits for the lifetime of the account. The customer must keep all required devices on the EnergyWise Home program for a minimum of 36 months or reimburse Progress Energy a portion of the \$550 program rebate. The amount of the reimbursement will be determined based on the number of months remaining before the 36 months is completed. The prorated monthly amount is \$15.28. For example, if you have completed 27 months on the program, you would be nine months short of the 36 month commitment; nine months x \$15.28 per month = \$137.52 due to Progress Energy.

If the customer becomes ineligible for any reason or withdraws from participation in Progress Energy’s EnergyWise Home program, customer agrees that he or she shall be obligated to immediately reimburse to Progress Energy the proportionate amount as set forth above.

I have read and understand the above information.

The Progress Energy account shall not have previously received a SunSense Solar Water Heating program incentive. The PEF account must have completed a Home Energy Check within 24 months BEFORE the installation of the Solar Water Heating system to qualify for the Progress Energy rebate.

The solar water heater must be new and installed after the SunSense Solar Water Heating program’s effective start date of March 1, 2011. Installations not performed by a contractor properly licensed in accordance with any applicable state and local laws, codes, statutes, ordinances, rules, administrative orders, regulations and requirements to install solar water heaters are not eligible for participation in Progress Energy’s SunSense Solar Water Heating program. Changes to any of the heating, cooling and water heating systems required for participation in Progress Energy’s EnergyWise Home program may impact customer’s eligibility. Customers must receive prior written acknowledgment from Progress Energy prior to making any modifications to such systems. Customer acknowledges and agrees that any written acknowledgment by Progress Energy regarding any modifications to systems listed above is solely and exclusively for the benefit of Progress Energy in order to determine the customer’s eligibility with respect to Progress Energy’s EnergyWise Home program. Customer further expressly acknowledges and agrees that any such written acknowledgment by Progress Energy shall in no way be construed as a representation or warranty of any kind by Progress Energy, including but not limited to any warranty as to the suitability or operation of any such system or any energy savings.

When participating in the SunSense Solar Water Heating program, if customer is currently participating in the winter-only schedule of the EnergyWise Home program, the account will be upgraded to the EnergyWise Home year-round schedule to comply with the SunSense Solar Water Heating program participation requirements.

By signing below, customer has read and agrees to the information listed on this application and all disclaimers. Further, customer acknowledges his or her receipt of the Progress Energy “SunSense Solar Water Heating Rebate Application.” Customer acknowledges and agrees that all references herein to Progress Energy shall be deemed to mean Florida Power Corporation d/b/a Progress Energy Florida, Inc.
